Tables as images in majority of MSDN blogs. HTML5 seems to be already here!

Great intro Jen, that even I can follow the javascript 😊 Also good to note the SVG/HTML5 differences...something I've been meaning to look into!

@ibmec – LOL. Sorry about that! I had the table as an image, so I used it like that without transcribing...we developers are nothing if not lazy. 😊 But you're absolutely right – for accessibility reasons, a real table would be much better. I'll update for you.

@Amelia – glad it was helpful!
